ASPLOS 2019

24rd International Conference on Architectural Support for Programming Languages and Operating Systems

Abstract submissions  Jul 31, 2018
Full paper submissions  Aug 7, 2018
Author response  Oct 17-19, 2018
Notification  Nov 7, 2018
Final copy deadline  Jan 14, 2019

General Chairs  Iris Bahar and Maurice Herlihy (Brown University)
Program Chairs  Emmett Witchel (UT Austin) and Alvin R. Lebeck (Duke University)

ASPLOS is the premier forum for multidisciplinary systems research spanning computer architecture and hardware, programming languages and compilers, operating systems and networking. ASPLOS 2019 will be held in Providence, Rhode Island, a historic city with modern University ties.

Like its predecessors, ASPLOS 2019 invites papers on ground-breaking research at the intersection of at least two ASPLOS disciplines: architecture, programming languages, operating systems, and related areas. Non-traditional topics are especially encouraged. The importance of cross-cutting research continues to grow as we grapple with the end of Dennard scaling, the explosion of big data, scales ranging from ultra-low power wearable devices to exascale parallel and cloud computers, the need for sustainability, and increasingly human-centered applications. ASPLOS embraces systems research that directly targets these new problems in innovative ways. The research may target diverse goals, such as performance, energy and thermal efficiency, resiliency, security, and sustainability. The review process will be sensitive to the challenges of multidisciplinary work in emerging areas.

Areas of interest include, but are not limited to:

- Existing and emerging platforms at all scales, from embedded to cloud
- Internet services, cloud computing, and datacenters
- Multicore architectures and systems
- Heterogeneous architectures and accelerators
- Systems for enabling parallelism at an extreme scale
- Programming models, languages, and compilation for all platforms
- Managing, storing, and computing on big data
- Virtualization and virtualized systems
- Memory and storage technologies and architectures
- Power, energy, and thermal management
- Security, reliability, and availability
- Verification and testing, and their impact on design
- Support for approximations and approximate computing
- Non-traditional computing systems
Program Committee
Emmett Witchel, University of Texas at Austin, Chair
Alvin R. Lebeck, Duke University, Chair

Marcos Aguilera, VMWare Research Group
Saman Amarasinghe, MIT
Nadav Amit, VMWare Research Group
Murali Anavarum, University of Southern California
Arka Basu, Indian Institute of Science-Bangalore
Abhishek Bhattacharjee, Rutgers University
Michael Bond, Ohio State University
Irina Calciu, VMWare Research Group
Luis Ceze, University of Washington
Haibo Chen, Huawei
Eric Chung, Microsoft Research
John Criswell, University of Rochester
Reetuparna Das, University of Michigan
Christina Delimitrou, Cornell University
Joseph Devietti, University of Pennsylvania
Yufei Ding, UC Santa Barbara
Hadi Esmaeilzadeh, UC San Diego
Ashvin Goel, University of Toronto
Boris Grot, University of Edinburgh
Gernot Heiser, University of New South Wales
Hank Hoffman, University of Chicago
Daniel Jimenez, Texas A&M University
Brad Karp, University College London
John Kim, KAIST
Milind Kulkarni, Purdue University
Shan Lu, University of Chicago
Brandon Lucia, Carnegie Mellon University
Jason Mars, University of Michigan
Madan Musuvathi, Microsoft Research
Satish Narayanasamy, University of Michigan
Simon Peter, University of Texas at Austin
John Regehr, University of Utah
Scott Rixner, Rice University
Chris Rossbach, University of Texas at Austin
Adrian Sampson, Cornell University
Xipeng Shen, North Carolina State University
Tim Sherwood, UC Santa Barbara
Mark Silberstein, Technion
Karin Strauss, Microsoft Research
Mike Swift, University of Wisconsin–Madison
Lingjia Tang, University of Michigan
Mohit Tiwari, University of Texas at Austin
Dan Tsafrir, Technion
Haris Volos, Hewlett Packard Labs
Carl Waldspurger, Self
Thomas Wenisch, University of Michigan
Dave Wentzlaff, Princeton University
Chia-Lin Yang, National Taiwan University
Irene Zhang, Microsoft Research
Yiying Zhang, Purdue University
Zheng Zhang, Rutgers University
Zhidong Zu, Institute of Computing Technology
